RIMA OFFERS AIA/CEU CREDITS ON NEW ONLINE TEST

The Reflective Insulation Manufacturers Association (RIMA) in conjunction with Ron Blank and Associates has recently made available a new industry test offering AIA and CEU credits to architects and engineers worldwide.

The test can be accessed in English, French and Spanish and consists of 13 questions on the subject of reflective insulation, radiant barriers and interior radiation control coatings. This new test opens the doors of educational opportunity to architects and engineers that has never before been available.

Interested parties can find a link to the test on the association's website at www.rima.net or they can go directly to the Ron Blank site at www.ronblank.com. Once on the site, select the 'Continuing Education' option then select the 'Reflective Insulation' course. Educational credits are issues monthly to all participants who successfully complete the test.

To help in preparing for the course and/or to learn more about the industry, visitors to www.rima.net can read RIMA's educational handbook (from which the course was prepared) "Understanding and Using Reflective Insulation, Radiant Barriers and Radiation Control Coatings". Simply select the option "Information on Reflective and Radiant Barrier Insulations" in the upper left-hand corner of the screen.

Ron Blank & Associates hosts and markets several different continuing educational courses for architects and engineers via their website at www.ronblank.com. They are well known by thousands of architectural and engineering firms across the nation and make face-to-face calls to offer AIA/CES educational opportunities to architects and engineers.

The Reflective Insulation Manufacturer's Association is a small group of dedicated people who have worked for a number of years to gain acceptance of reflective insulations and radiant barriers. Over those years, RIMA has been the major force in establishing fair ASTM standards for testing and installation procedures. RIMA welcomes all who are interested in promoting and directing the growth of the industry. For more information about membership or the industry, please contact Executive Director Mary Edmondson at the number shown above.
