

REFLECTIVE INSULATION MANUFACTURERS ASSOCIATION

DATE: May 2005
FOR IMMEDIATE RELEASE
CONTACT: MARY A. EDMONDSON
800/279-4123

NEW RIMA TECHNICAL BULLETIN AVAILABLE

Enclosed is the latest Technical Bulletin produced by the Reflective Insulation Manufacturers Association (RIMA) entitled "**Reflective Insulations in Duct System Applications**".

This is the fourth in an ongoing series of technical bulletins the association is producing which address specific product applications regarding the reflective insulation and radiant barrier industries. Please review it carefully and contact us with any questions you may have. There is a lot of conflicting information out on these topics, and we hope that by producing these bulletins it will help answer many questions regarding the industry.

You can find all of our technical bulletins, some of which have been translated into French and Spanish, on our website at <http://www.rima.net>. There you will also find the latest version of our handbook "*Understanding and Using Reflective Insulation, Radiant Barriers and Interior Radiation Control Coatings*" as well as many other industry articles, a link to our AIA accredited course for architects/engineers, information on the association, our officers and member lists, membership information and upcoming association events and activities.

We invite you to visit our website and to contact us for specific industry information and/or article development or training. You can contact us directly at 800/279-4123 or via e-mail at rima@rima.net.

The Reflective Insulation Manufacturer's Association is a group of dedicated people working together to propagate the knowledge and use of reflective insulations and radiant barriers. RIMA has been the major force in establishing fair ASTM standards for testing and installation procedures. RIMA welcomes all who are interested in promoting and directing the growth of the industry.
