Plan Now to Attend the 2018 I-RIM Conference in Costa Rica

The 2018 International Reflective Insulation Manufacturers (I-RIM) Conference will take place May 9-10 at the beautiful Marriott Los Sueños Resort in Puntarenas, Costa Rica. We are excited to host our first event in Central America and look forward to welcoming many new guests to this international gathering.

Along with the new venue come many diverse speakers presenting in both English and Spanish to provide even more opportunity for participation. Hosted by RIMA International, this event is the only worldwide educational and information sharing conference for the reflective insulation, radiant barrier and interior radiation control coating (IRCC) industries. Experts and industry professionals from all regions of the world come together to share and learn the latest research, advances, uses and accomplishments in reflective technology.

New for 2018 are the sponsor opportunities built into the program. There are seven (7) 10 minute slots spaced throughout the program where industry suppliers can present information about their company/product/service to conference guests. If you provide any type of product or service to the reflective products industries, you must be a sponsor in order to share your literature and information at this event. Contact RIMA-I for more details at rima@rima.net.

The full conference program is almost complete and will be distributed in detail shortly along with session descriptions and speaker bios. Hotel reservations can be made online now by visiting www.rimainternational.org and clicking on the 'I-RIM Conference' menu. Additional travel information can be found there as well.

If you are a professional in the reflective products industry, you simply cannot afford to miss this event. Held every two-years there won't be another opportunity until 2020 so mark your calendar now and plan to attend. We look forward to meeting you there.

(The Reflective Insulation Manufacturer's Association International is a group of dedicated people working together to propagate the knowledge and use of reflective insulations and radiant barriers. RIMA-I has been the major force in establishing fair ASTM standards for testing and installation procedures. RIMA-I welcomes all who are interested in promoting and directing the growth of the industry. For more information about membership or the industry, please contact Executive Director Mary Edmondson at 800/279-4123 or visit us on our website at www.rimainternational.org.)
